Allowable Subject Matter

1. Claims 1-27 are allowable.

The following is an examiner's statement for reasons for allowance. ✓

2. Claims 1, 12, and 23 are allowable over the prior art of record since the cited references taken individually or in combination fail to particularly teach or fairly suggest a method for distributed control of a communication switch including a switch fabric and a plurality of switch satellites, in which the switch satellites include interfaces to external communication channels and interfaces to the switch fabric, and maintain one or more ingress queues for ingress communications from the external communication channels to the switch fabric, and one or more egress queues for egress communications from the switch fabric to the external communication channels, comprising gathering performance parameters in each switch satellite in the plurality from other switch satellites in the plurality, the performance parameters indicating a status of one or more egress queues maintained in the respective switch satellites, sharing bid data among switch satellites in the plurality, the bid data including a set of bids for use of egress queues during the switch cycle, the bids in the set including a destination identifier indicating a destination egress queue in one of the plurality of switch satellites, and a pressure parameter indicating a result of a combination of the performance parameter of the destination egress queue with a condition of a source ingress queue, computing a connection map based on the bid data gathered from the plurality of arbitration units in at least one of the switch satellites in the plurality, and configuring the switch fabric based upon the connection map.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
